Pipette tips and refill systems

Filter tips ROTILABO®

ROTH SELECTION. Material: PP, Filter made of PE. Autoclavable: No.

Filter tips eliminate harmful aerosol transfer during pipetting and protect pipette shafts from contamination and cross-contamination. In this way, reproducible and reliable results are guaranteed. The efficient barrier against aerosols and vapours also protects against radioactive, environmentally harmful or corrosive substances penetration the pipette body.

- Made of non-cytotoxic, biologically inert and highly transparent polypropylene
- Hydrophobic filters made of pure polyethylene
- Free of chemical additives, no risk of cross-contamination in case the liquid comes into contact with the filter
- Filter pore size of 10-40 µm for extremely high filter density
- Production under strictly controlled clean room conditions
- Extra smooth inner surface
- Graduation for quick and convenient visual volume testing
- Universal fit to many popular pipette brands, simple and effortless ejection
- Special design prevents DNA denaturation
- **Free from RNase/DNase and human DNA**
- **Pyrogen and PCR-inhibitor free**
- **Non-metallic**
